## M2 Asset Tracking Beacon

### Asset Tracking Beacon

Bluetooth Low Energy(BLE) is a wireless area network that allows people within its range to see its location easily, it can also be employed in the tracking of valuable assets.

#### CHARACTERISTICS:

- Nordic nRF52811 SoC (Hardware is compatible with Bluetooth 5.1 )
- Integrated 3-axis accelerometer and magnetic (Hall-effect sensor) switch sensors
- Accelerometer sensor for motion detection can identify whether the Beacon is moving
- Smartphone app (iOS & Android, and provide SDK) easily configures all parameters
- Wide broadcast range (up to 160 meters)
- Temperature and humidity sensor integrated
- Barometer integrated to assist the gateway to locate the asset label accurately

- Barometer integrated to assist the gateway to locate the asset label accurately
- Long-lasting 1000-mAh lithium coin battery (replaceable)
- Smartphone application for easy configuration

#### APPLICATIONS:

- Warehouse & Inventory
- Vehicle monitoring
- Proximity security detection
- Health care equipment monitoring
- Personal tracking
